Personal Statement

Academically, I am equipped with a robust foundation in economic theory, policy analysis, and quantitative methodologies. Moreover, my skill set extends beyond the traditional boundaries of economics. I have cultivated a strong aptitude for coding, with a particular focus on quantitative methods for data analysis and data modeling. During my PhD I plan to strengthen my skills as well as contribute relevantly to the economic literature.

Occupation

Einaudi Institute for Economics and Finance (EIEF), Italy 2024 - present
